| <b>no.</b><br>The eight professional qualifications of the external curriculum of the Academies of Architecture are included in this column. | In this column, the eight professional qualifications are specified in further detail, formulated as learning outcomes.<br><br>Short explanation learning outcome:<br>Learning outcomes are generally expressed as knowledge, skills or conduct. Learning outcomes are descriptions of what the student is expected to know (BA: knowledge), to understand (BA: insight) and/or can show (BA: skill) after completing a learning process.<br><br>The experience aspects mentioned in the BA overview of the Bachelor End Project (BEP) exit qualifications form non-exhaustive examples for clarification of the way in which the exit qualifications can be fulfilled, for both the candidate, the mentor, the professional experience period committee and the study programmes as provider.<br><br>In this overview, some experience aspects have been grouped with a different professional qualification or exit qualification in comparison with the BEP overview. However, almost all experience aspects have been added as explanatory examples to the professional qualifications or exit qualifications. | <b>Operational levels</b>                                 | To monitor the progress of the students during the study programme, three operational levels have been specified                                                                                                                       |         |         |
|                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <b>Learning outcomes professional experience products</b> | In this column, examples are described of products which students supply to substantiate that the professional qualifications have been acquired.<br><br>Learning outcomes specify how to demonstrate what has been learned to others. |         |         |

| <b>6.</b><br><b>Designing</b> | Researches, analyses and defines functional and conceptual points of departure for the design and, creates the foundation for a design in a structure design or functional-spatial concept, and develops this into an integral final design and/or spatial advice. | <b>Operational levels</b>                                 | Formulates an elementary spatial formulation of a problem.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Formulates a spatial formulation of a problem using relevant analysis and/or research results.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Formulates a clear spatial formulation of a problem on the basis of targeted research prior to and during the design process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                               |                                                                                                                                                                                                                                                                    |                                                           | Translates points of departure and preconditions to the design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Applies the points of departure and the preconditions coherently to a design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Applies complex points of departure and preconditions to a convincing design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                               |                                                                                                                                                                                                                                                                    |                                                           | Recognises relevant design tools and relevant design techniques essential to the design question.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Deploys appropriate design tools and design techniques to find a spatial solution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Efficiently deploys design tools and design techniques for the spatial solution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
